Description

A portfolio site to promote myself and display my projects. I'm also using it as a playground to practice UI design.

Features

- Contact
- Projects
- Resume

Technology Stack

- JavaScript
- React
- HTML/CSS

Demo

What I Learned

- More practice with React; specifically routing.
- How to embed a PDF.
- That different browsers deal with iFrames differently. (Safari is complicated).
- Got some valuable practice with aligning things in CSS.

What's Next

- Trello board: <https://trello.com/b/qvZHIS5W/vk-portfolio-%F0%9F%8C%BE>
- I want to make the UI more fun, add animations, since one of the purposes of this site is also for me to practice UI design. I want to keep working on it and use this site for practice, changing up the style.
- Make resume HTML, so it's searchable.
- Ability to look at projects by category / tech used.
