PROJECT EXPERIENCE

Food Journal — Visual Calorie Tracker

- Featured on CareerKarma as the #3 project of March 2020.
- An alternative to typical calorie-tracking apps that allows users to log the meals they eat using pictures.
- Built with JavaScript, HTML5, CSS, and the WebRTC API. Data is stored with Firebase.
- Mobile responsive web app that currently works with Android phones and will be compatible with iPhones in the near future.
- Focuses on logging meals with pictures, not lists. The user types the calories and takes a picture. The calorie total of the day automatically updates.

WORK EXPERIENCE

Teaching Assistant — SavvyCoders, St. Louis

January 2020 - Present

- Guiding students as they create their projects.
- Tutoring a special needs student in web development.

Sales Associate — JCPenney, Fenton

August 2017 - December 2017

- Patiently provided customer service, which built rapport and resulted in customers coming to me specifically when they visited the store.

EDUCATION

SavvyCoders 12-Week Bootcamp, Certificate of Full Stack Web Development — 2019

Vivek Khattri's Agile Master Class, Agile Certification — 2019

Jefferson College, Associate of Arts Degree — 2017
